

SERVING YOUR BUSINESS

CONSTRUCTION

Expertise

Whatever your construction material needs, ABP can handle them. Throughout our network of 21 ports around Britain, our expert and highly trained teams are ready to work in partnership to deliver the right solutions for your business.

Our ports have an extensive and successful history, together with many years of unparalleled expertise, in safely handling a wide range of bulk cargoes. This is further supported by an ongoing investment programme that keeps our port infrastructure, equipment and people at the highest professional levels possible. Cementitious, mineral or sensitive construction cargoes are routinely handled with precision and efficiency by our expert teams. From the lightest to the heaviest and from the awkward to the simple, ABP has the right facilities and expertise for all your cargo handling needs.

We work flexibly and collaboratively with our customers to provide solutions that meet your requirements. Utilising our port locations, we are well positioned to offer a multi-port distribution package with one consolidated contractual agreement, offering significant benefits for your business.

ABP's extensive portfolio of facilities, backed by well-equipped stevedoring operations and other services, will help your business succeed.

Facilities

We understand that you and your customers need safe and time-efficient handling, keeping control of your costs. ABP's extensive portfolio of facilities, backed by well-equipped stevedoring operations and other services, will help your business achieve that objective.

ABP has recently invested more than £500 million in port facilities and equipment. This includes state-of-the-art cranes, terminal facilities, handling equipment and industry-leading bulk storage bays. ABP can discharge or load vessels faster than ever before, keeping cargoes safe and secure.

Further recent investments include specialist silo and covered storage solutions tailored to meet customers' needs. A number of these facilities also benefit from rail access.

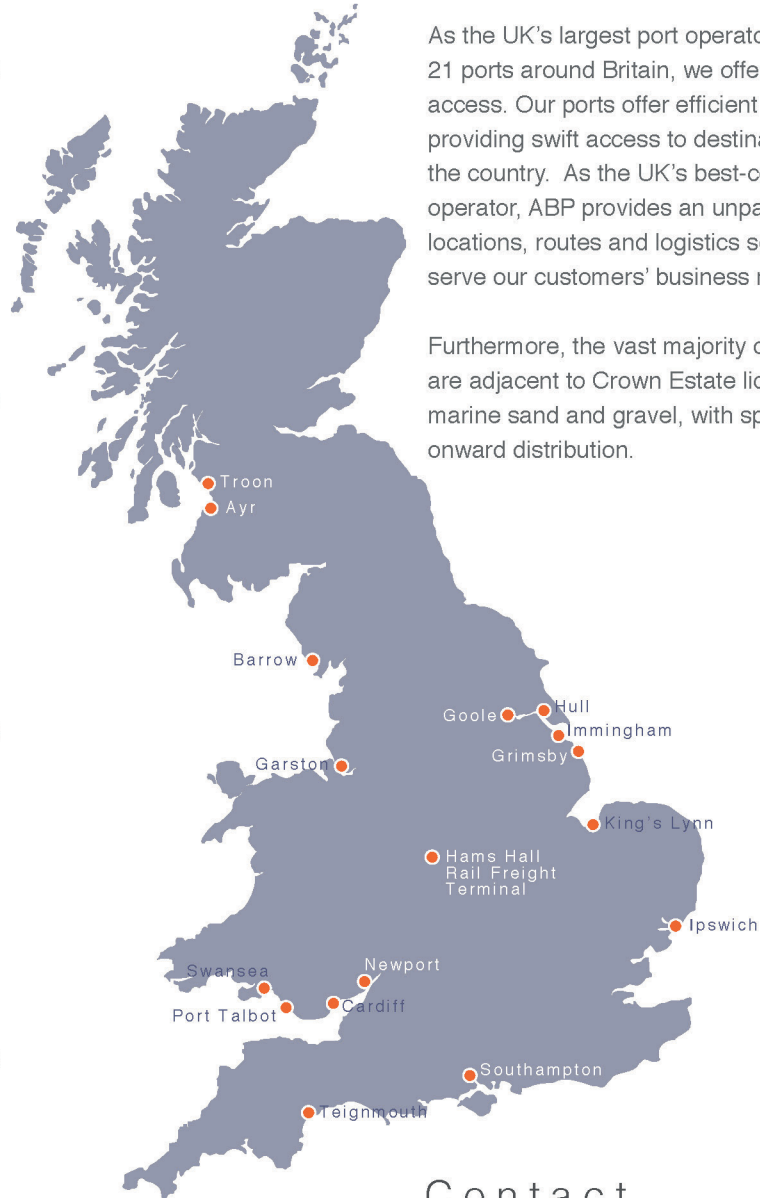

Every one of our 21 ports, together with ABP's Hams Hall Rail Terminal, one of the UK's busiest inland bulk and container terminals, is capable of handling a wide range of construction materials.

Connectivity

As the UK's largest port operator with a network of 21 ports around Britain, we offer excellent marine access. Our ports offer efficient road and rail links, providing swift access to destinations throughout the country. As the UK's best-connected port operator, ABP provides an unparalleled range of locations, routes and logistics solutions ready to serve our customers' business needs.

Furthermore, the vast majority of our port locations are adjacent to Crown Estate licenced areas for marine sand and gravel, with space for storage and onward distribution.

Contact

We are ready to help deliver the solutions your business needs. For more information, contact our construction sector expert, Paul Litten.
